

Mr. Hannigan is founder and president of Integrated QMS Solutions, LLC. Prior to the founding of iQMSs, he served as a quality, regulatory, and operations executive in the biologics, pharmaceutical, and medical devices industries, as well as clinical laboratories. His 35 years of experience includes several start-up companies developing quality, regulatory, and operational programs taking product from research and development, to clinical and commercialization. He earned a BS in Medical Technology from West Virginia University School of Medicine and a MS in Quality Engineering from Southern Polytechnic State University. He holds Regulatory Affairs Certification, Certified Quality Auditor, Lean Six Sigma Certification, and MT certification as designated by the American Society for Clinical Pathology. He held senior positions at Aderans Research Institute, Bayer HealthCare, Clingenix, Quintiles Laboratories, CryoLife, Kendall McGaw Pharmaceuticals, and CalScott Laboratories, and started his career as a clinical microbiologist at West Virginia University Hospitals. Integrated QMS Solutions has provided support to various vaccine start-ups, cell-culture media, allogeneic cell therapeutics, and bone marrow harvesting and purification start-up companies.
